

More Multiplication & Division Word Problems

- 1. Farmyard Feathers:** We've got 12 chickens, and each lays 4 eggs a day. If we collected 38 eggs today, how many did we miss? If we divide the missed eggs equally among my 4 kids, how many eggs does each kid get?
- 2. Bike Rental:** A bike rental shop has 250 bicycles. They rented out 3 bicycles to each of 40 tourists. How many bikes do they have left?

3. **Birthday Cake:** Samantha bought a cake that serves 96 people for her birthday. After serving 2 pieces each to 35 guests, how many pieces are left?

4. **Library Books:** A small library shelf has space for 8 books in each row. If there are 15 rows and we already filled up 112 books on the shelf, how many more books can we fit?

5. Nature Park: A nature park has 15 spots available for camping. Each spot can hold 3 tents. If 47 tents show up, how many won't have a spot?

6. School Play: A school play sells tickets for 8 shows. They sell 45 tickets for each show. After 5 shows, how many tickets have they sold in total?

7. **Art Supply Stock:** In an art class, there are 9 students, and each is given 5 paintbrushes. If 37 of these paintbrushes are lost by the end of the year, how many are left? If the teacher divides the remaining brushes equally among the 8 students, how many does each student get?
8. **Book Fair:** During a book fair, each student can buy up to 5 books. If 18 students each bought the maximum number of books and 23 students each bought 3 books, how many books were sold in total?

9. Aquarium Visit: There are 120 fish in an aquarium. During a cleaning day, 5 fish moved to each of 9 tanks. How many fish are still in the main aquarium?

10. Bakery Treats: I baked 7 trays of cookies, each with 24 cookies. If my friends ate 158 cookies during the party, how many cookies are left? If I give an equal amount of the remaining cookies to my 2 dogs, how many will each dog get?

11. Stadium Seats: A small stadium has 15 rows with 50 seats in each row. If there are 3 empty seats in each row, how many people are seated?

12. Pizza Party: For a pizza party, 20 pizzas were ordered. Each pizza has 8 slices. If 138 slices were eaten, how many full pizzas are left?

13. Sports Balls: There are 10 different sports teams at a school, and each team is given 6 balls. If 48 balls were deflated, how many balls are still usable?

14. Beach Trip: A bus can take 50 people to the beach. If 7 buses are full and one last bus only has 22 people, how many people are going to the beach?
